Duct Acoustic Insulation

The main purpose of Duct Internal Acoustic Insulation is to dampen the sound of the ventilation system. This is done in order to not let the noise of the Fan transfer to every area that the duct travels to.

- Open Cell Nitrile Rubber**
- Excellent NRC value
 - Open Cell Elastomeric Nitrile Rubber
 - Inherent Anti Microbial Properties
 - Easy to Apply with Adhesive

- Resin Bonded Wool Board**
- Best Fire properties – NFPA 90A, 90B, Life Safety Code 101, Non Combustible
 - Density – 150 kg/m³ Thickness – 25 mm
 - Facing – Plain (Covered with Perforated Sheet)

Detailed description: This is a screenshot of a Zoom meeting window. The title bar at the top reads 'Zoom Meeting'. Below the title bar, there is a header area with several participant names: 'Dr J R Mehta...', 'LINGESHKUMA...', 'Rushil Raina Ms...', 'Deepika Rajai G...', and 'Divyang Prajapa...'. To the right of these names is a blue arrow icon. Below the header, there is a 'Recording...' indicator with a pause icon. The main content area is dominated by a large video feed showing a man in a white lab coat and a face mask working at a table in a laboratory or workshop. The table is cluttered with various items, and other people can be seen in the background. At the bottom of the window, there is a toolbar with several icons: 'Unmute', 'Stop Video', 'Security', 'Participants' (with a count of 42), 'Polls', 'Share Screen', 'Pause/Stop Recording', 'Support', 'Reactions', and a red 'End' button.
